EDUCATION

University of Mines and Technology

Bachelor of Science

Tarkwa, Ghana

2021 – 2025

- Relevant Coursework: Data Structures, Database Systems, Software Engineering, Web Programming, AI in Engineering, Discrete Mathematics, Computer Architecture

Ghana Secondary Technical School

WASSCE Certificate

Takoradi, Ghana

2017 – 2020

- General Science

WORK EXPERIENCE

Vela Partners

Web Scraping Engineer

Remote, US

May 2022 – Dec 2025

- Architected and operated **scalable data acquisition pipelines** extracting structured market and startup intelligence from protected and JavaScript-heavy platforms.
- Developed **adaptive crawling systems** using Scrapy, Playwright, and Selenium with dynamic rendering, session orchestration, and automated failure recovery.
- Implemented **intelligent anti-bot strategies** including behavioral throttling, fingerprint management, session persistence, and distributed request routing to maintain high data availability.
- Designed data ingestion workflows into **BigQuery and PostgreSQL** with schema normalization, deduplication, and quality validation for analytics consumption.
- Delivered external data products via **FastAPI services** powering investor dashboards and decision-support analytics.
- Collaborated with analytics teams to translate raw web data into **actionable market signals and growth indicators**.

Xcelsz

Web Scraping Intern

Remote, UK

Feb 2022 – May 2022

- Built automated extraction pipelines for UK real estate platforms, collecting listings, pricing signals, and property metadata.
- Engineered a **robust multi-format address parsing system** to improve search accuracy across regional variations.
- Enhanced scraper reliability through structured validation, edge-case handling, and monitoring instrumentation.

PROJECTS

Production Web Data APIs | *Python, FastAPI*

- Designed and deployed **production-grade web data APIs** delivering structured datasets from multiple online sources.
- Implemented automated extraction, normalization, and delivery pipelines with built-in rate control and fault tolerance.
- Published developer-facing APIs consumed by external clients via RapidAPI. <https://rapidapi.com/user/ElormCodes1>

Twitter Data API | *Python, FastAPI*

- Developed a RESTful API to collect Twitter user data including followers, following, tweets, and profiles.
- Integrated official APIs with **custom caching, pagination, and rate-limit handling** for reliability and speed.
- Designed for use in analytics dashboards and automated data pipelines.

Google Maps Leads Scraper | *Python, FastAPI*

- Built a lead generation scraper extracting business names, categories, locations, and contact data from Google Maps.
- Handled dynamic loading, scrolling, and blocking behavior using browser automation.
- Delivered structured outputs in **JSON and CSV** through an API interface for client consumption.

WhatsApp Automation Scraper | *Python, Automation*

- Developed an automation system for WhatsApp Business accounts, enabling message workflows and data extraction for businesses.

TECHNICAL SKILLS

- Languages:** Python, JavaScript
- Data Acquisition:** Scrapy, Playwright, Selenium, Browser Automation, Distributed Crawling
- AI-Enhanced Extraction:** Content classification, adaptive parsing, heuristic detection, automated data structuring
- Backend & Data:** FastAPI, REST APIs, PostgreSQL, BigQuery
- Infrastructure:** Linux, Docker, GCP, Bash, Git
- Expertise:** Large-scale scraping architecture, anti-bot resilience, dynamic website extraction, data pipeline design, external data product development
